SUBJECT INDEX

ACTH
  ectopic, syndrome, 139
Ad4BP
  steroidogenic cell-specific transcription factor, function and distribution of, 81
Adrenal cells
  protein phosphorylation patterns produced in, by activation of cAMP-dependent and Ca-dependent protein kinases, 95
Adrenocortical steroidogenesis
  regulation of, by benzodiazepines, 75
cAMP-dependent protein kinase
  effect of, on protein phosphorylation patterns in adrenal cells, 95
Androgen(s)
  effects of 5α-reductase inhibitors in intraprostatic, in the rat, 381
  potential activities of, metabolizing enzymes in human prostate, 395
  receptors(s)
    mutations of, 443
  role of, on growth of the androgen-dependent tumor of the prostate, 401
Anti-androgen(s)
  mechanisms and actions of, in target cells, 387
Androgen-binding protein (ABP)
  endocytosis of, by spermatogenic cells, 533
  receptors for, internalization and intracellular signalling, 561
  steroid binding and dimerization domains, 543
  tissue-specific expression and biological activity of, in transgenic mice, 573
Angiotensin II type 1A
  receptor gene: role of glucocorticoid responsive elements in rat, 69
Antiprogestin
  novel mechanisms of, action, 9
Apoptosis
  regulation of, by steroid hormones, 1
Aromatase
  a molecular model for the interaction between vorozole and other non-steroidal inhibitors and human cytochrome *P*450 19, 191
  Arimidex: a new oral, inhibitor, 175
  in bone cell: association with osteoporosis in postmenopausal women, 165
  R-76713: a new oral, inhibitor, 267
  sexual dimorphism in the developmental regulation of brain, 307
  transcriptional regulation of the human, cytochrome *P*450 gene expression in human placental cells, 181

Benzodiazepine
  receptor(s)
    hormonal regulation of peripheral-type, 57
Brain
  catecholamines in steroid-dependent, development, 349
  effects of steroids on the, opioid system, 343
  sexual differentiation of, studies with a new aromatase inhibitor, R76713, 267
  sexual dimorphism in the developmental regulation of, aromatase, 307
Breast cancer cells
  estrone sulfate-sulfatase and 17β-hydroxysteroid dehydrogenase activities in, 407
  oxidative and reductive pathways of estrogens in hormone responsive and non-responsive human, 367
Breast tumors
  role of cytokines and sulphatase inhibitors in regulating oestrogen synthesis in, 413

Ca-dependent protein kinase
effects of, on protein phosphorylation patterns in adrenal cells, 95
Chicken ovalbumin upstream promoter transcription factor (COUP-TF)
expression during mouse embryogenesis, 503
Chorionic gonadotropin
role of oestradiol-17β and progesterone in the regulation of synthesis and secretion of, by the first trimester human placenta, 233
Clinical steroid research
discrepancies between, and molecular biology results, 159
Contraceptive(s)
subdermal, implants, 223
transdermal application of steroid hormones for, 247
Corticosteroid-binding globulin (CBG)
in fetal development, 523
structure and function of, role of carbohydrates, 515
Cytochrome *P*450 (11β)
structure–function relationships of the enzyme and its involvement in the blood pressure regulation, 89
transcriptional regulation of the human aromatase, gene expression in human placental cells, 181
Cytokines
role of, in regulation of estrogen synthesis in breast tumours, 413

1,25-Dihydroxyvitamin D_3
immunomodulatory actions of, 599
induction of human leukemia cells by, 431
cDNA(s)
distribution of 3α-hydroxysteroid dehydrogenase in rat brain and molecular cloning of multiple, encoding structurally related proteins in humans, 41

Estrogen(s)
oxidative and reductive pathways of, in hormone responsive and non-responsive human breast cancer cells, 367
receptor(s)
independent expression of progestin receptors by, in human meningioma, 361
potential interactions between, and thyroid receptor relevant for neuroendocrine systems, 27
Estrone sulfate-sulfatase
role in the evolution of human breast cancer from hormone-dependence to hormone-independence, 407

Fatty acid(s)
activation by, of peroxisome proliferator-activated receptor, 467
Ferredoxin
regulation of, gene in steroidogenic and nonsteroidogenic cells, 47
regulation of the, component of renal hydroxylases at the transcriptional and postranslational levels, 595
basic-Fibroblast growth factor (bFGF)
in ovarian cancer, 375
Follicle stimulating hormone (FSH)
receptor
molecular biology of, 215

Gene(s)
multi, family of murine 3β-hydroxysteroid dehydrogenase, 111
regulation of ferredoxin, in steroidogenic and nonsteroidogenic cells, 47
regulation of steroidogenesis, 19
regulation of the, for insulin-like growth factors I and II and their receptors by steroids and gonadotropins in the ovary, 219
structure and regulation of the luteinizing hormone receptor, 283
transcriptional regulation of the human aromatase cytochrome *P*450, expression in human placental cells, 181
Glial cells
metabolism of steroids in pure cultures of, role of intracellular signalling, 331

Glucocorticoid(s)
long-term control of neuronal excitability by, hormones, 315
molecular genetic analysis of, signalling in development, 33
regulation of hypothalamic somatostatin by, 277
Glucocorticoid responsive elements
role of, in rat angiotensin II type 1A promoter, 69
Gonadal functions
involvement of a direct neural mechanism in the control of, 299
Gonadotropin(s)
glutamate: a major neuroendocrine excitatory signal mediating steroid effects on, secretion, 325

Hormone replacement therapy (HRT)
benefits and risks of, 205
17α-Hydroxylase/17,20-lyase
defects of, 153
3α-Hydroxysteroid dehydrogenase(s)
distribution of, in rat brain, 41
3β-Hydroxysteroid dehydrogenase
molecular basis of human, deficiency, 127
murine, multigene family: structure, function and tissue-specific expression, 111
17β-Hydroxysteroid dehydrogenase
activity in human breast cancer cells, 407
molecular biology of androgenic, 37
Hypertension
mineralocorticoid receptors and, 53
Hypothalamus
gonadal hormone regulation of neuronal–glial interactions in the developing neuroendocrine, 293

Insulin-like growth factors (I and II)
regulation of the genes for, and their receptors by steroids and gonadotropins in the ovary, 219

Leukemia cells
differentiation induction of human, by a combination of 1,25-dihydroxyvitamin D_3 and retinoic acid, 431
Leydig cells
differentiation of adult, 61
Luteinizing hormone
structure and regulation of the, receptor gene, 283

Meningioma
oestrogen receptor independent expression of progestin receptors in human, 361
Mineralocorticoid(s)
receptor(s)
in hypertension, 53
Molecular genetic analysis
of glucocorticoid signalling in development, 33
Mouse mammary tumor virus (MMTV)
steroid hormone receptor status defines the, promoter chromatin structure *in vivo*, 421

Neuroendocrine systems
potential interactions between estrogen receptor and thyroid receptor relevant for, 27
Neurosteroids
biosynthesis and assay of, in rats and mice: functional correlates, 355
19-Nor-androgens
different patterns of metabolism determine the relative anabolic activity of, 253

Osteoporosis
aromatase in bone cell: association with, in postmenopausal women, 165

Ovarian cancer
basic fibroblast growth factor in, 375
Ovarian hormones
effect of, on hypothalamic excitatory amino acid system during sexual maturation in female rats, 337
Ovary
maturation of, granulosa cells and a novel role for antioxidants in the corpus luteum, 241
regulation of the genes for insulin-like growth factors I and II and their receptors by steroids and gonadotropins in the, 219

Parathyroid hormone-related protein
expression and action in the rat uterus, 259
Peroxisome proliferator-activated receptor (PPAR)
fatty acid activation of, 467
Phosphorylation
and progesterone receptor function, 509
Placenta
role of oestradiol-17β and progesterone in the regulation of synthesis and secretion of chorionic gonadotropin by the first trimester human, 233
steroid–protein interaction in human, 227
transcriptional regulation of the human aromatase cytochrome *P*450 gene expression in human, cells, 181
Postmenopausal women
aromatase in bone cell: association with osteoporosis in, 165
Progesterone
actions of, on human sperm: a model of non-genomic effects of steroids, 199
receptor(s)
and the mechanism of action of progesterone antagonists, 449
definition of the critical cellular components which distinguish between hormone and antihormone activated, 487
phosphorylation and, function, 509
Progesterone antagonists
progesterone receptor and the mechanism of action of, 449
Prostate
growth of the androgen-dependent tumor of the, role of androgens and of locally expressed growth modulatory factors, 401
potential activities of androgen metabolizing enzymes in human, 395

Receptor(s)
androgen(s)
mutations of, 443
androgen-binding protein(s)
internalization and intracellular signalling, 561
benzodiazepine
hormonal regulation of peripheral-type, 57
role of the peripheral-type, in steroidogenesis, 103
estrogen(s)
-independent expression of progestin receptors in human meningioma, 361
potential interactions between, and thyroid receptor relevant for neuroendocrine systems, 27
follicle stimulating hormone
the molecular biology of, 215
insulin growth factors (I and II)
regulation of the genes for, by steroids and gonadotropins in the ovary, 219
luteinizing hormone
structure and regulation of the, gene, 283
peroxisome proliferator-activated
fatty acid activation of, 467

progesterone
and the mechanism of action of progesterone antagonists, 449
definition of the critical cellular components which distinguish between hormone and antihormone activated, 487
phosphorylation and, function, 509
progestin
estrogen receptor independent expression of, in human meningioma, 361
retinoic acid(s)
developmental roles of, 475
steroid hormone(s)
status of, defines the mouse mammary tumor virus promoter chromatin structure *in vivo*, 421
thyroid
potential interactions between estrogen receptor and, relevant for neuroendocrine systems, 27
vitamin D
expression of human, 583
5α-Reductase
effects of, inhibitors on intraprostatic androgens in the rat, 381
Retinoic acid(s)
cellular, binding proteins, 459
enzymes and binding proteins affecting, concentrations, 497
induction of human leukemia cells HL60 by, 431
receptor(s)
developmental roles of, 475

Sex hormone binding globulin (SHBG)
and female reproductive function, 529
genetic variations in human, 553
interrelations between, plasma lipoproteins and cardiovascular risk, 567
steroid binding and dimerization domains, 543
Somatostatin
regulation of hypothalamic, by glucocorticoids, 277
Sperm
actions of progesterone on human, a model of non-genomic effects of steroids, 199
Steroid hormone(s)
receptor(s)
status of, defines the mouse mammary tumor virus promoter chromatin structure *in vivo*, 421
regulation of apoptosis by, 1
transdermal application of, for contraception, 247
upregulation of rat angiotensin II type 1A receptor gene by, 69
Steroidogenesis
gene regulation of, 19
in human prepubertal testicular cells in culture, 119
role of the peripheral-type benzodiazepine receptor and the polypeptide diazepam binding inhibitor in, 103
Steroidogenic cells
regulation of ferredoxin gene in, 47
Steroid–protein interaction
in human placenta, 227
Sulfatase inhibitor
in human breast cancer cell lines, 407
role of, in regulating oestrogen synthesis in breast tumours, 413

Testicular cells
steroidogenic capacity, paracrine and hormone control of human prepubertal, in culture, 119
Thyroid
receptor(s)
potential interactions between estrogen receptor and, relevant for neuroendocrine systems, 27

Uterus
endothelin expression in, 209
steroid regulation of parathyroid hormone-related protein expression and action in the, of rat, 259

Vitamin D
chemistry and conformation of, molecules, 603
receptor
-mediated genomic action of the $1,25(OH)_2D_3$ hormone: expression of the human, in *E. coli*, 583
Vitamin D binding proteins
plasma, multiple tasks, 579
